

The Future of Cloud: Strategy, Investments and Future Innovation Areas

The core incubations and disruptive technologies shaping the cloud's future and the next wave of innovation across industry, government and society

Connectivity

We see new business scenarios emerging across industries

Large outdoor Infrastructures

Energy (oil and gas)

Large numbers of underground, connected devices

Agriculture

Connectivity for rural areas to enable irrigation sensing

Long linear Infrastructures

Smart Roads

Improve traffic flow, safety, and maintenance operations

Smart Rail

Connectivity supporting passengers and cargo

Indoor + Outdoor Facilities

Manufacturing

Automation to improve worker safety and productivity

Transportation

Improved airport operations for baggage handling

Remote Portable Networks

Healthcare

Support field operations with remote expert help and augmented reality

First Responders

Improve first responder safety and effectiveness

Public/Consumer Facilities

Smart Spaces

Real-time digital signage in public areas

Retail

Real-time in-store stock updates to facilitate curbside pick-up

Smart Vehicles

Automotive

Autonomous vehicles with connected apps

Commercial

Support fleet operations and individual drivers

There are common patterns and needs as well across industries

Large outdoor Infrastructures	Long linear Infrastructures	Indoor + Outdoor Facilities	Remote Portable Networks	Public/Consumer Facilities	Smart Vehicles
Industries					
<ul style="list-style-type: none"> • Air transport • Energy • Mining 	<ul style="list-style-type: none"> • Transportation 	<ul style="list-style-type: none"> • Manufacturing • Retail 	<ul style="list-style-type: none"> • Defense • First responders 	<ul style="list-style-type: none"> • Sporting events • Concerts 	<ul style="list-style-type: none"> • Automotive
Patterns and Techniques

Use Cases					
<ul style="list-style-type: none"> • Smart Airports • Oil/gas infra • Mining infra • Port operations 	<ul style="list-style-type: none"> • Smart Roads • Smart Rail 	<ul style="list-style-type: none"> • Smart Factory • Store checkout 	<ul style="list-style-type: none"> • Tactic units • War ships • Firefighters 	<ul style="list-style-type: none"> • Stadiums and arenas • Arts venues 	<ul style="list-style-type: none"> • Connected vehicles • Remote control • Autonomous vehicles • Fleet management

Inventec and Nexcom: Transforming factory operations with private 5G

Inventec's connectivity infrastructure solution enables factories to become smart factories

Efficiency is unlocked with automated optical inspection, image recognition, remote collaboration, and more

Harvard Business Review

Innovation

Your Company Needs a Space Strategy. Now.

Rapidly falling launch costs and fleets of new satellites are opening up big opportunities for business. by Matthew Weinzierl, Prithwiraj (Raj) Choudhury, Tarun Khanna, Alan MacCormack, and Brendan Rosseau

From the Magazine (November–December 2022)

Planetary Computer Data

~67PB of Earth data, over 100 collections

Remote sensing data

- Landsat 4-9
- Sentinel-1, -2, -3, -5P
- GOES-16, -17, -18
- MODIS, NAIP, ASTER,

Weather/climate data

- CMIP6, ERA5, GFS, ISD, NEXRAD,

Land cover data

- CCI, Corine, CCAP, NLCD, CDL, USGS GAP, Esri/Impact Observatory 10m

Biodiversity data

- GBIF, NatureServe MoBI

...and many more

Evolution of satellite imagery

Corona (1967)

Landsat-7 (1999)

Ikonos-2 (circa 2000)

WorldView-3 (circa 2015)

Pléiades Neo - Tucson - USA - Acquisition angle 31°

Microsoft Premonition

Empower an open and inclusive ecosystem

A blue wireframe globe is positioned on the right side of the image, set against a dark blue background. The globe is composed of a network of interconnected nodes and lines, creating a mesh-like structure that represents a global network or data flow.

Thank you!
