

Uncovering IoT Opportunities with the Satellite-enabled Edge

Craig Allinson | IoT Product Manager

11 April 2024

The basics of the satellite-enabled edge

Coverage

Immediacy

Reliability

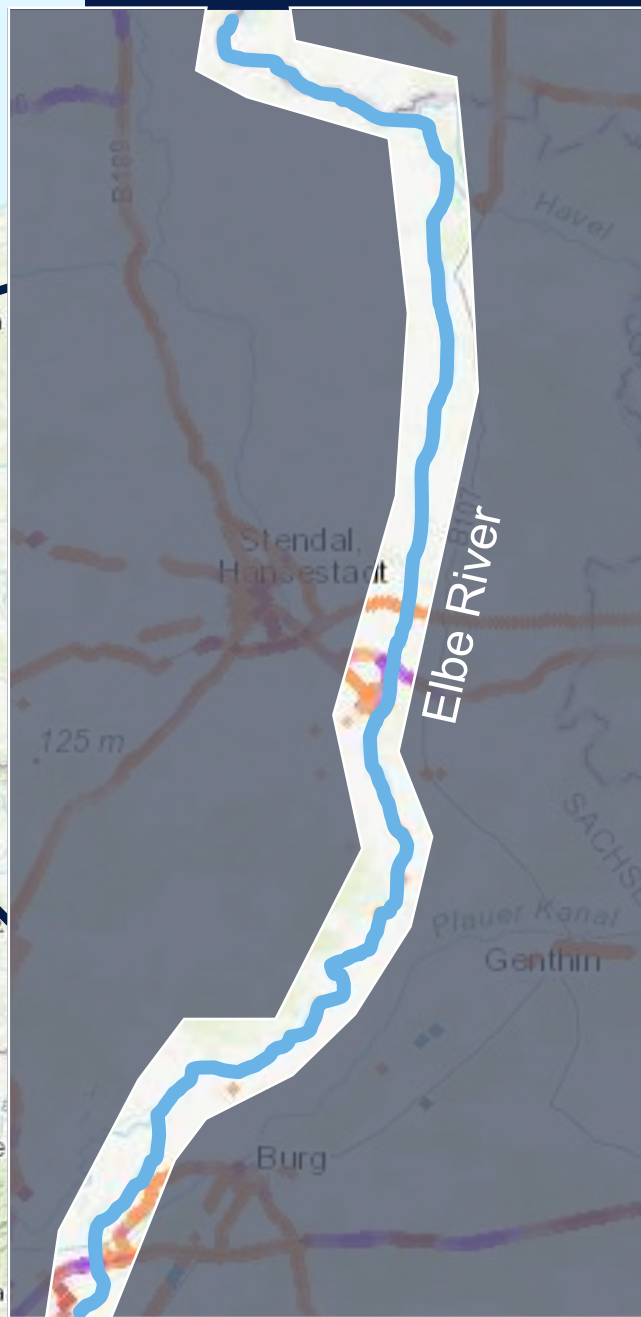

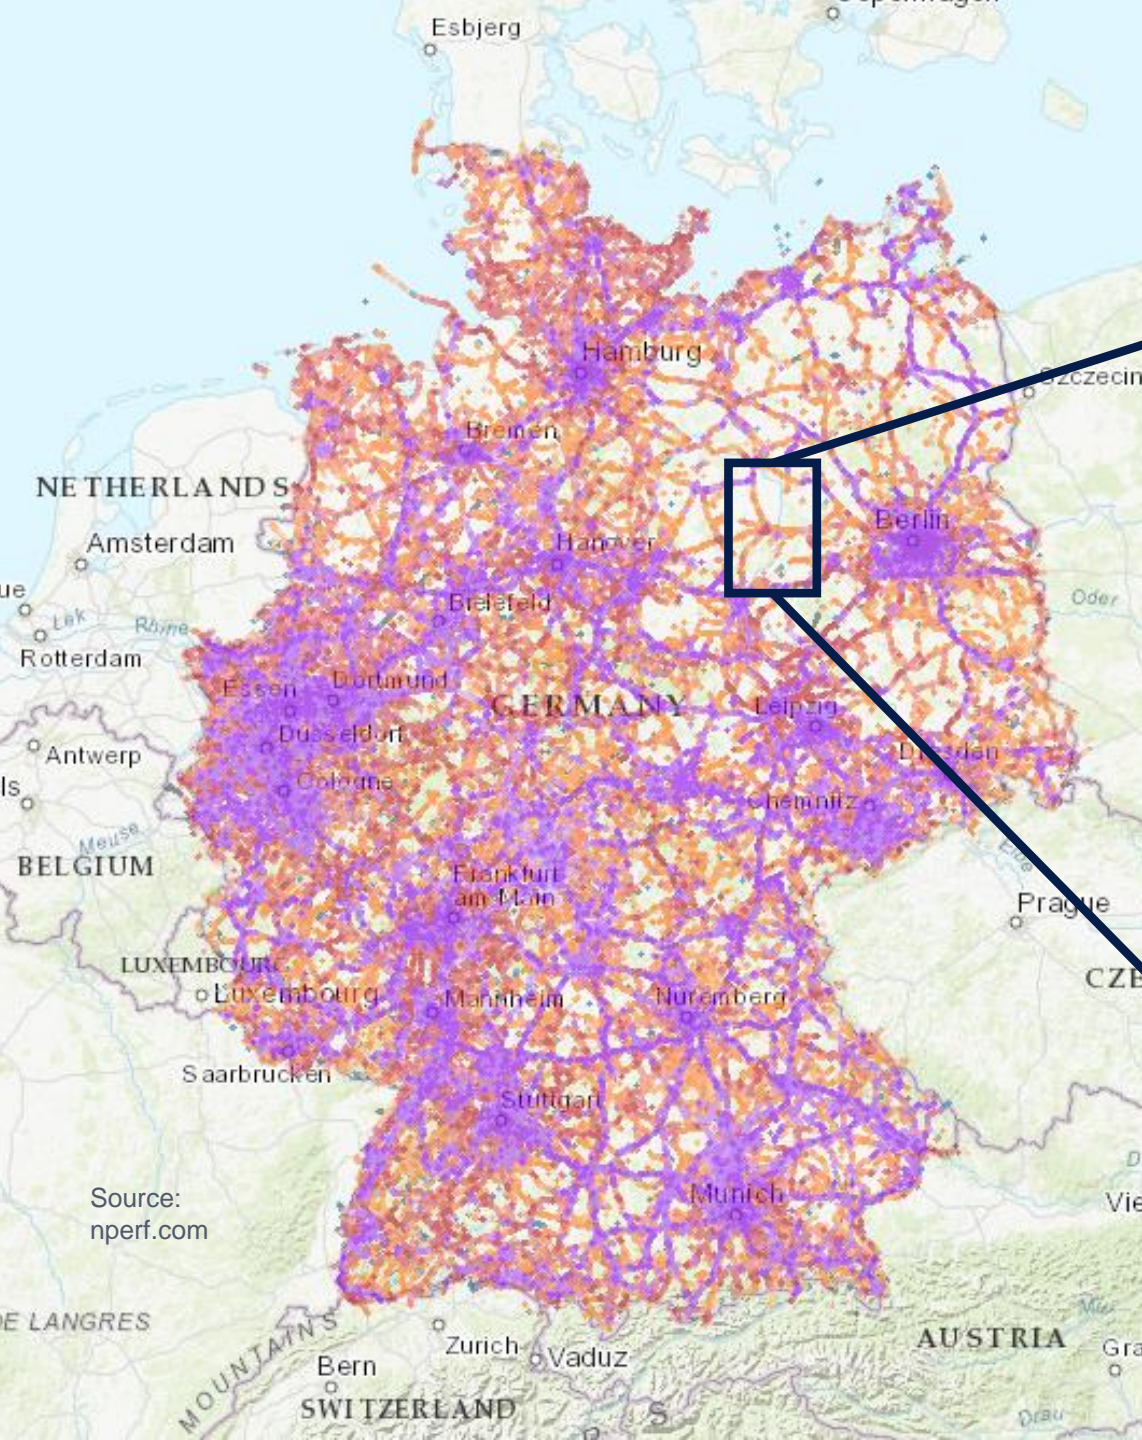

**Return on
Investment**

No cell towers,
no cell business case,
no connectivity—

**Stranded data
impacts operations**

“Cell service is everywhere” – except where it isn’t

IoT expands demand beyond “people places”

Environmental
monitoring drives
better planning
and decision
making

**Thousands of potential
data and control points in
modern agriculture**

Intelsat FlexEnterprise IoT

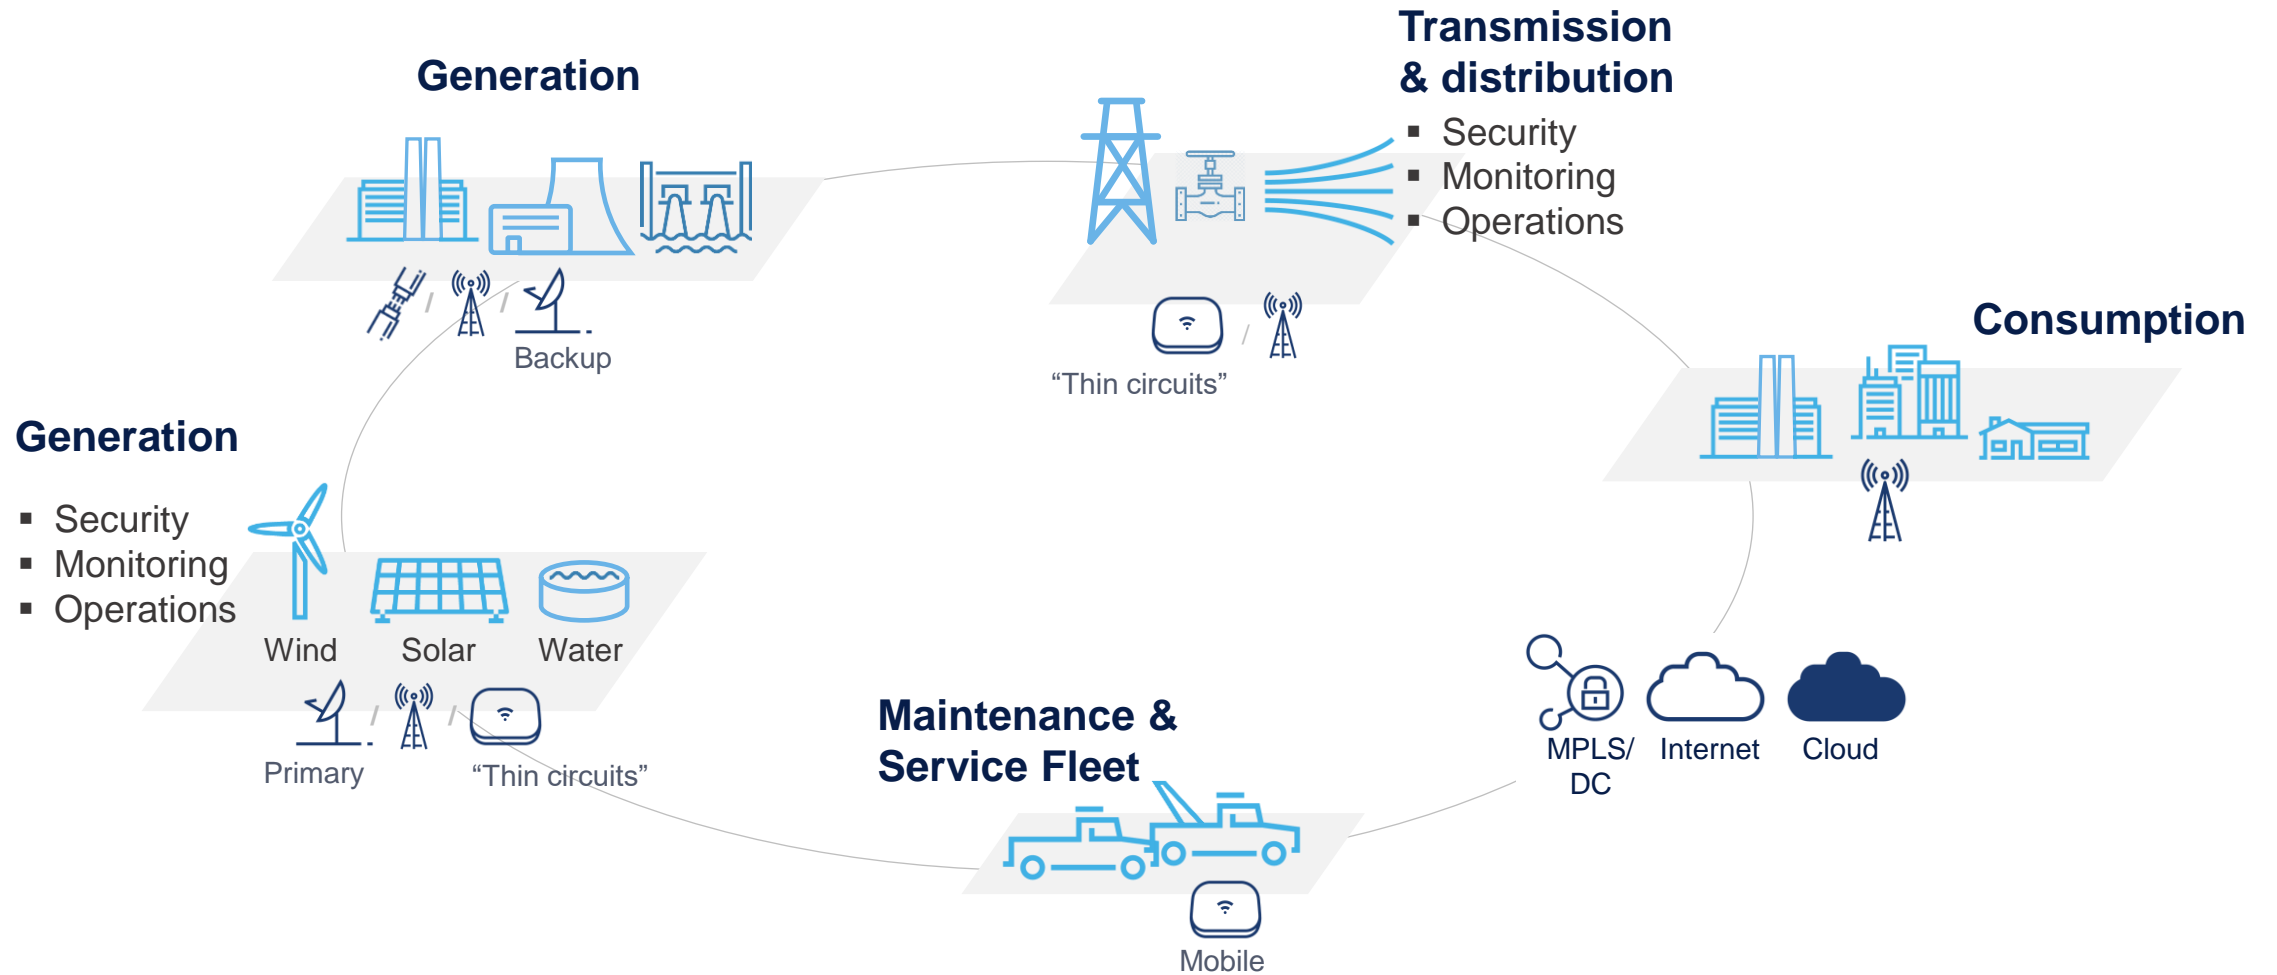

Leverage proven satellite connectivity to extend enterprises and industrial IoT globally

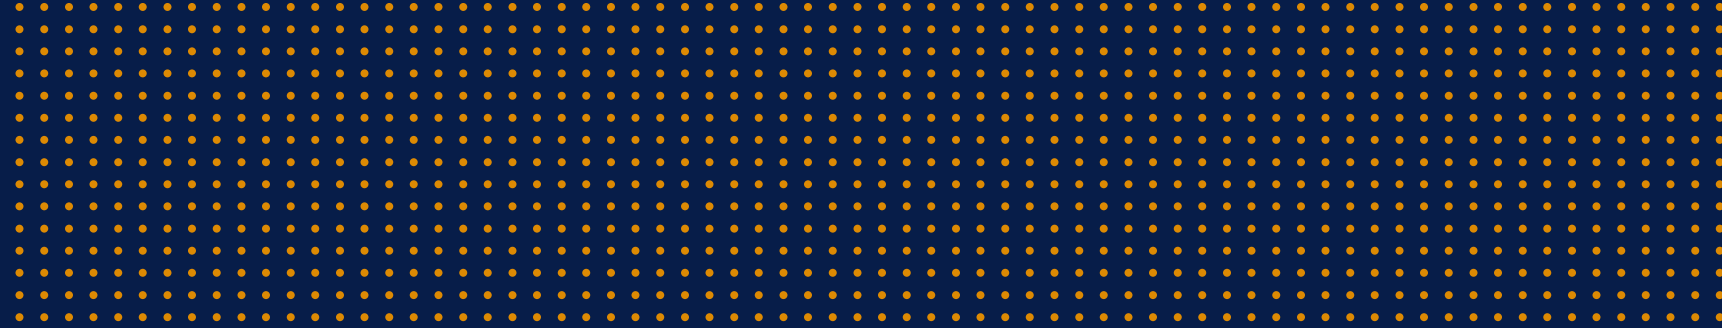

- Support real-time traffic
- Not limited to bursty data
- Include video and robust two-way comms

- Business-grade connectivity
- Support variety of enterprise applications
- Strengthen SD-WAN deployments

Use cases: Utilities

Thanks!
