

Never lose coverage.

The New Standard for Global IoT-NTN

April 9th 2026

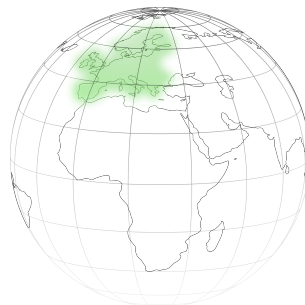

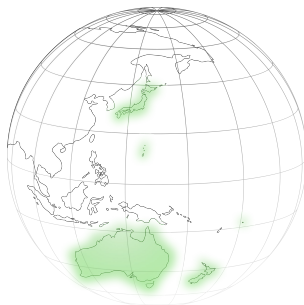

INTRO

Skylo is a Global Non-Terrestrial Network Operator

Largest cellular network on the planet, covering **>73 M km²**. Commercial service live in **39** countries.

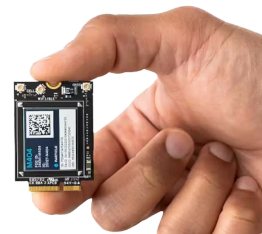

8 satellites, 5 satellite operators, across 3 spectrum bands

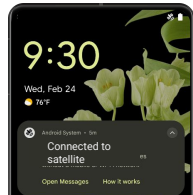

~16+ million activated devices on our network. Powered by Skylo: world's first NTN certification program.

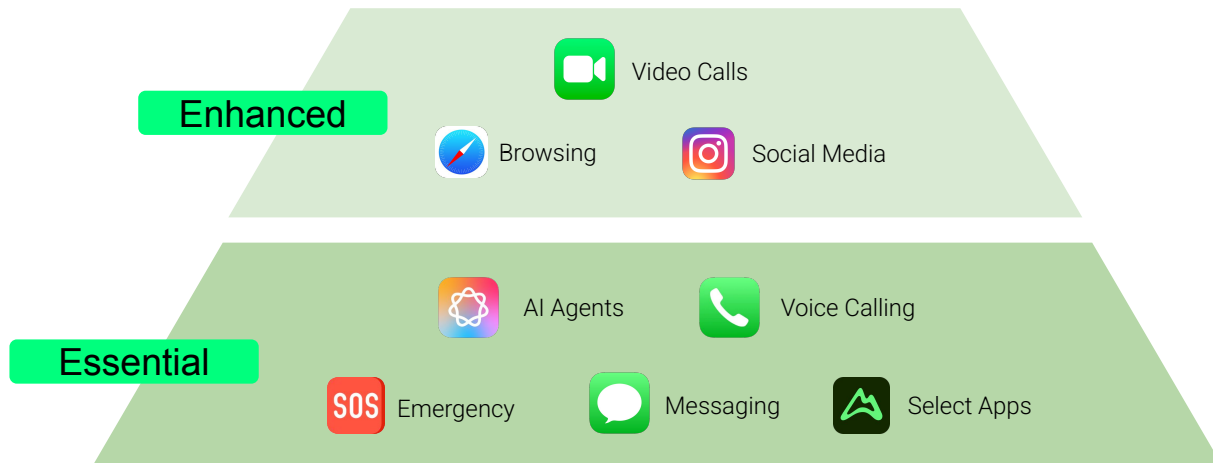

Serves Consumer, Automotive, & IoT devices

Skylo has converged the NTN ecosystem

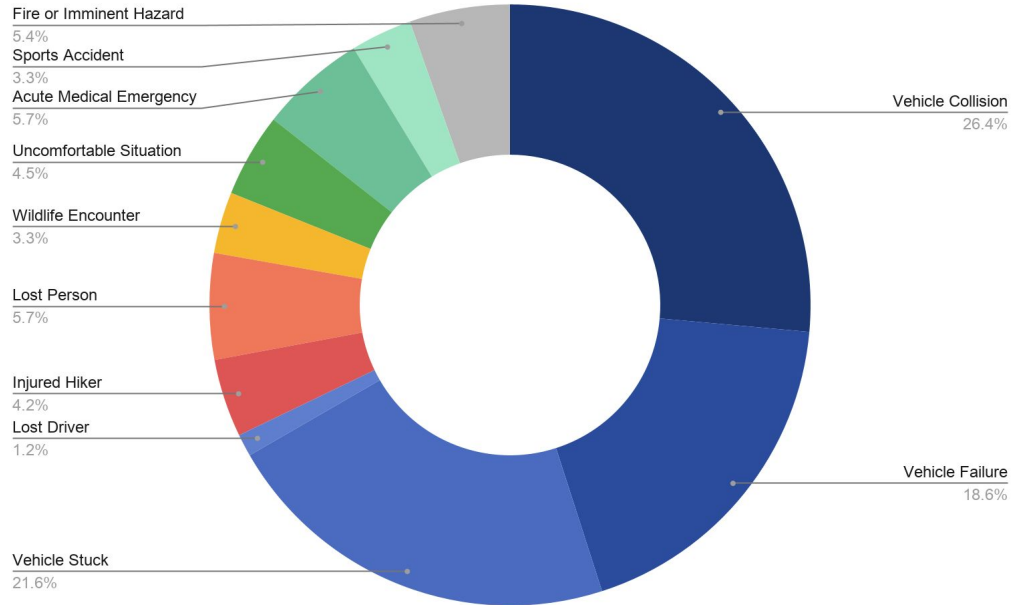

Chipsets	Certification Program	Phone OS Support	Network & Coverage
<p>Qualcomm (Snapdragon) ✓</p> <p>SAMSUNG (Exynos) ✓</p> <p>MEDIATEK ✓</p> <p>SONY ✓</p>	<p> ✓</p> <p> ✓</p> <p> ✓</p> <p> ✓</p>	<p></p>	<ul style="list-style-type: none">  >16 Million Activated Users  39 licensed countries  8 Satellites / 10 Earth Stations  200+ Spot Beams / Channels  5 Continents  Coverage: >73M km²
Modules	Devices	Carriers	Exclusive Features
<p>QUECTEL</p> <p> SEMTECH</p> <p> PARTICLE</p> <p> muRata MANUFACTURER IN ELECTRONICS</p> <p> Telit CERTIFICATION</p> <p> @blues</p> <p> COMPAL</p> <p></p> <p></p> <p></p>	<p></p> <p>SAMSUNG Galaxy</p> <p></p> <p></p>	<p>verizon✓</p> <p> Deutsche Telekom</p> <p> Telefonica</p> <p> emnify</p> <p></p>	<p> Voice Calls</p> <p> AI Agents</p> <p> 3rd Party Apps</p>

Skylo essential services are already delivering real-world impact

Compelling **essential services** to all subscribers, enhanced opportunities with midband speeds

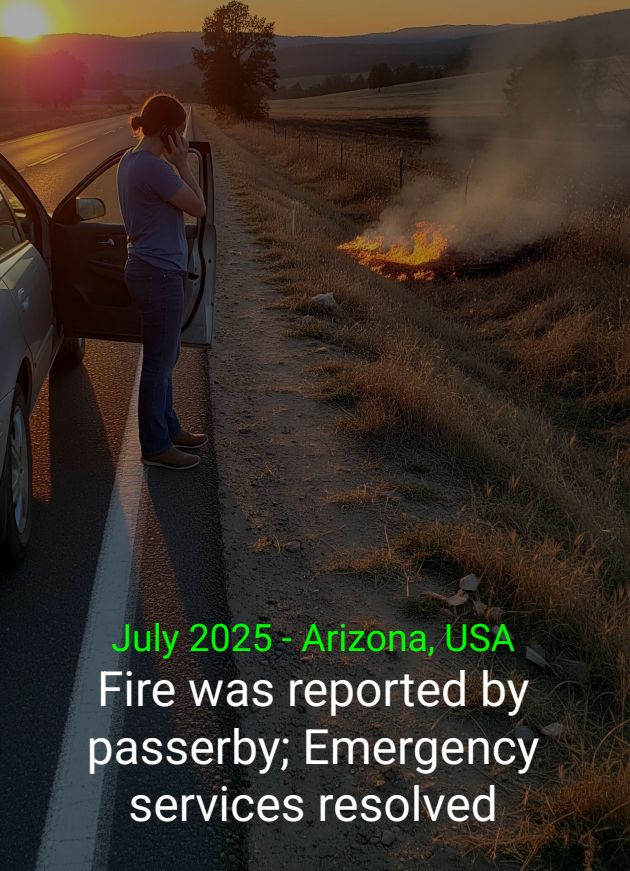

Emergency eSOS

Key Insights: About **65%** of these emergencies are related to vehicle collisions and failures. The number of vehicle incidents **increased by 11% from Q3'25 to Q4'25**, primarily driven by vehicles stuck in ice or snow.

Select eSOS Events

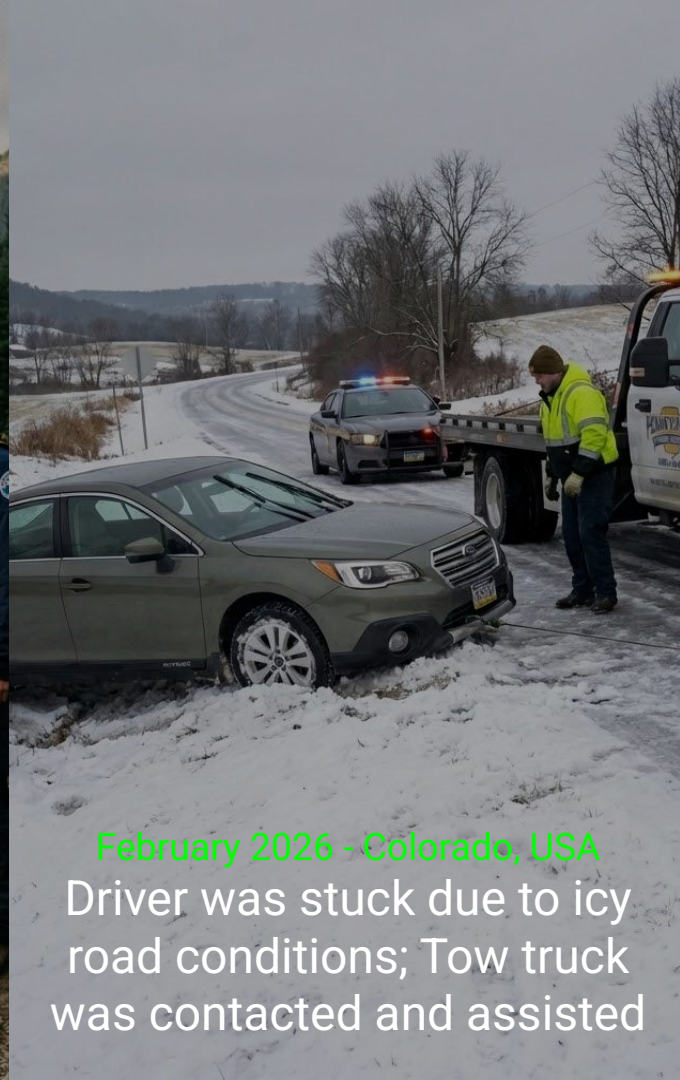

Source: Skylo data

July 2025 - Arizona, USA
Fire was reported by passerby; Emergency services resolved

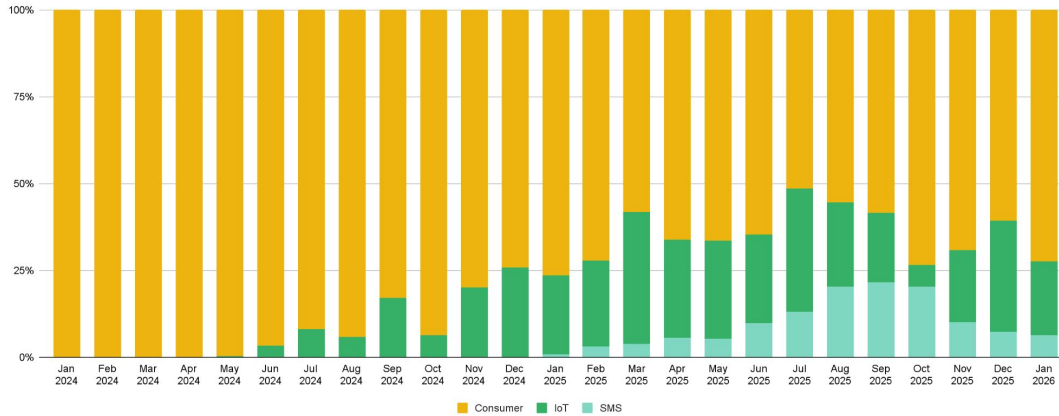

November 2025 - California, USA
A lost and cold hiker rescued and safely escorted to the trailhead

February 2026 - Colorado, USA
Driver was stuck due to icy road conditions; Tow truck was contacted and assisted

Growing enterprise/IoT applications & usage

Enterprise/IoT reached ~30% of network traffic in 2025, owing to high volume use-cases

Growing enterprise/IoT applications & usage

A G B O T™

New enterprise applications & devices being added across the network

Skylo satellite connectivity starts at the chipset and OS level

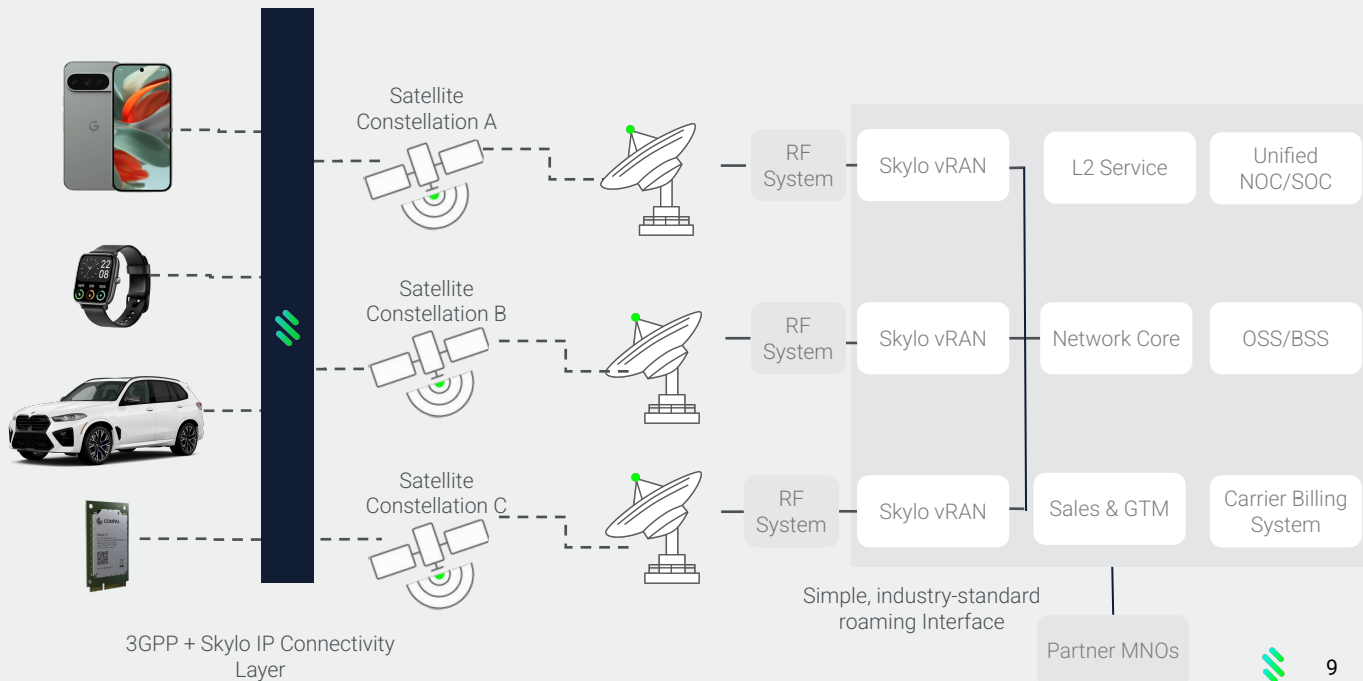

~16+ million devices activated from IoT to smartphones and wearables

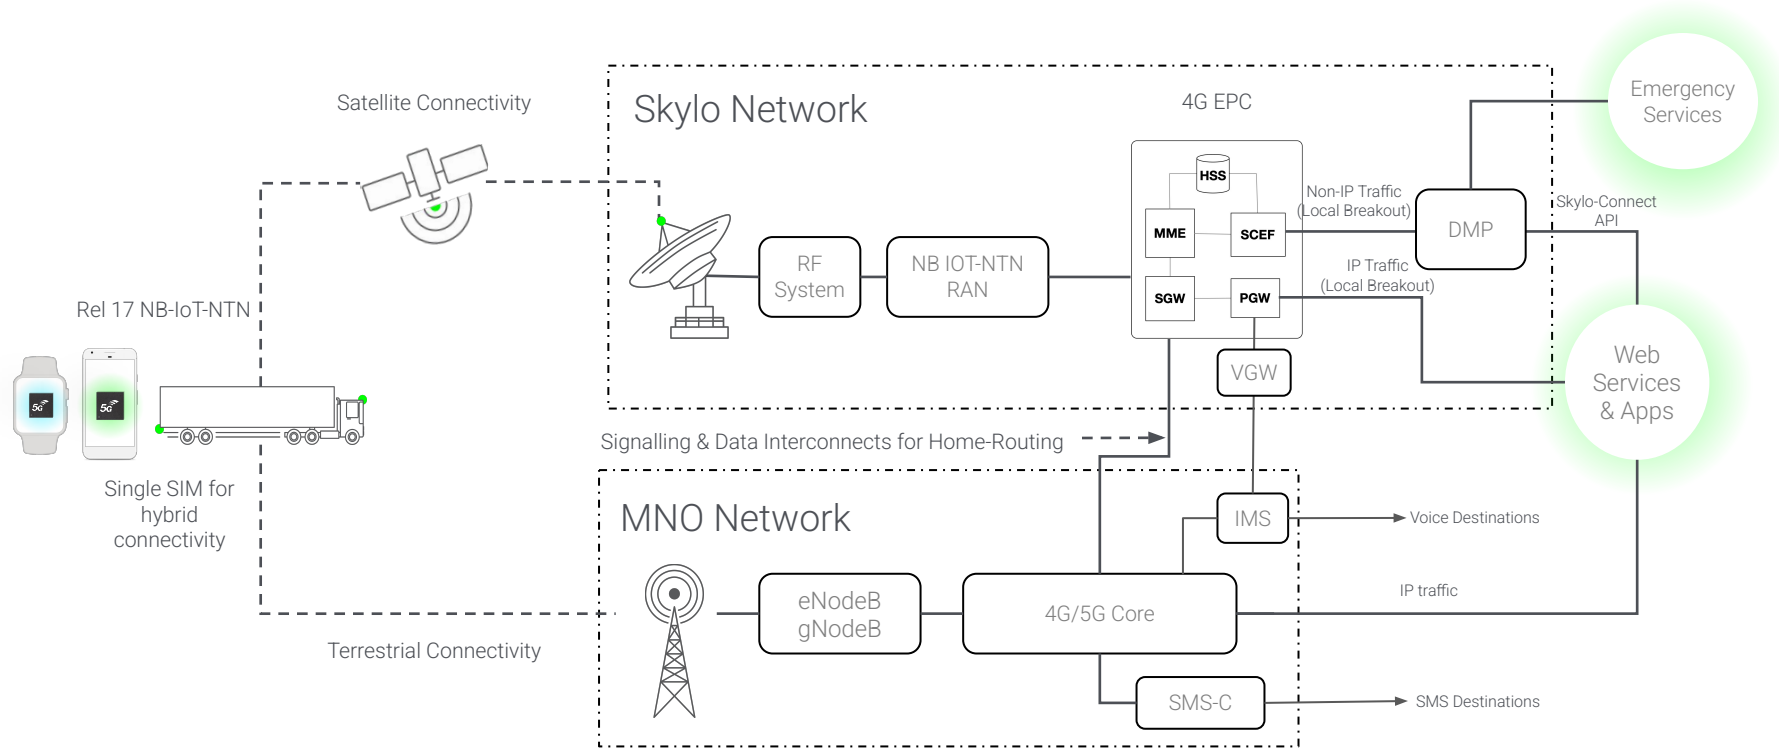

Service over MSS to GEO or LEO constellations, built above and beyond the latest 3GPP standards

Skylo certified chipsets and modules

From Satellite voice to Carrier native voice

Skylo's GSMA / 3GPP compliant architecture provides seamless MNO interoperability

Unlocking Global Markets: Evolved NTN in 6G

- Ubiquitous Connectivity: Leveraging NB-IoT NTN for essential connectivity and NR NTN for high-throughput services, establishing a strategic bridge toward 6G unified NTN to realize a true Network of Networks.
- Multi-orbit: Combining low-latency LEO paths with deep-penetration GEO links to provide a robust, multi-layered communications fabric.
- Data Sovereignty: Deploying architectures specifically engineered to comply with national spectrum regulations, landing rights, and stringent security policies.
- Invisible Network: Implementing truly seamless mobility to enable service continuity and continuous coverage for critical sectors like automotive, maritime, and mission-critical communications.
