

Enabling Mobile IoT Applications over Satellite

Rajesh Suseelan
March 09, 2021

Quick Facts & Stats

- Owned by ST Engineering
- Over 35 years of innovation
- Acquired Newtec in 2019
- 1,000 employees globally
- Centers of Excellence in USA, Singapore and Belgium
- Product portfolio branded under **iDirect** and **Newtec**
- Leader in Enterprise, Mobility, Broadcast and Government/Military Markets
- iDirect Government, wholly owned subsidiary, leader in US DoD

Our Technology Vision

Make it possible for our customers to build multi-orbit strategies on the world's first cloud-based, multi-access technology platform.

IoT Value Chain

Environmental Monitoring

Enterprise Fixed

IoT is not a 'one size fits all'

Low Data Rate

Remote Monitoring

Smart Agriculture

Smart Metering

Asset Tracking

Fleet Management

Medium Data Rate

Industrial Control

Heavy Equipment Telematics

Smart Grid Automation

Vessel VMS

SCADA

High Data Rate

IOT Backhaul

Rail Telemetry

Oil & Gas

Critical Infrastructure

Vessel Monitoring

Low device cost, low operational cost, low energy, small data volumes massive numbers

Low data, time sensitive

High reliability, Low latency, high data volume, high availability, performance flexibility

Events-Based
Small data bursts of up to 30Kbps
1-2MB per month usage

Events-Based or Demand-Based
Higher Throughput 10-100Kbps
eg: Up to 25MB per month usage

Demand-Based or Continuous
Throughput 10-500Kbps
eg: 100's MB per month usage

Higher throughput and volume

Satellite IoT adoption challenges

- Cost
- Size
- Power
- Interoperability
- Flexibility
- Deployment

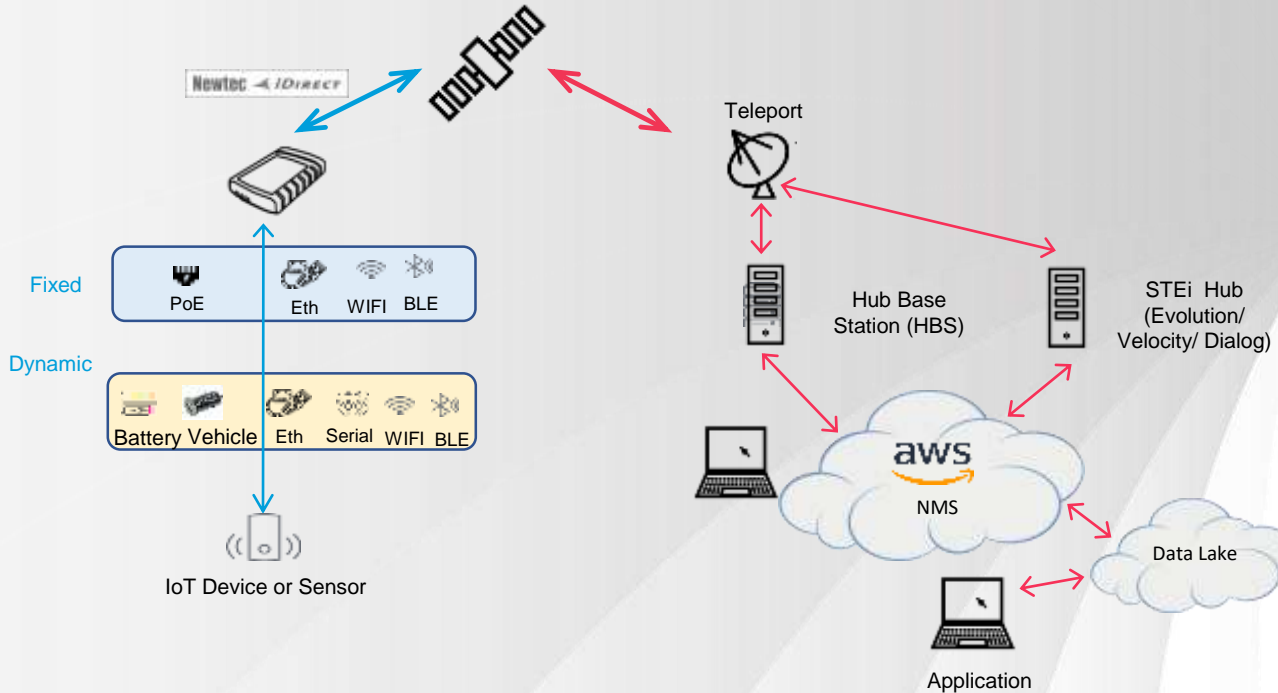

Value Proposition IoT Solutions

- Complete IoT solution leveraging an IoT optimized waveform, cloud-based NMS and small form-factor IoT terminal
- Providing a flexible service enablement model for immediate market access
- Reducing the upfront capital investments and operational complexity

Complete IoT Solution

- Service Enablement
- Cloud based NMS/OSS
- Hub Enablement
- IoT Optimized Waveform
- IoT Terminals

Confidential & Proprietary

Terminals Designed for IoT

Compact terminals with versatile connectivity options

- Rugged and compact terminals
- Low Power
- IP enabled
- Support for Ka and Ku bands
- Easy set up and deployment
- Support Wi-Fi, Ethernet, Serial and BLE
- Phased Array Antennas for mobility applications

Fixed

Ka Fixed Terminal

Ku Fixed Terminal

Mobile

Ka Dynamic Terminal

Ku Dynamic Terminal

Enabling mobility applications

Maritime

Fleet Management

Rail

Mining & Construction

Agriculture

- Real-time information on status and location of maritime assets
- Vessel performance management
- Fishing catch reporting

- Real-time tracking of vehicles and mobile assets
- Cold chain, cargo tracking
- Fleet Telematics
- Driver Safety
- Route Optimisation
- Despatch applications

- Rail telemetry and communications
- Rail condition monitoring
- Track side monitoring
- Positioning and Navigation

- Heavy Equipment Monitoring
- Asset Utilisation
- Telemetry reporting

- Telemetry reporting
- Predictive maintenance
- Fuel Monitoring
- Precision Agriculture

Fishing
